

Special approval and advance assessment of designated equipment, containers and accessories

When applying for designated equipment inspection, container inspection and accessory inspection, it is necessary to confirm the conformity to the applicable regulations and exemplified standards. If the conformity to the regulations is not confirmed, it is necessary to obtain the special approval from the Minister of Economy, Trade and Industry. If the exemplified standards (detailed technical standards that are illustrated as examples by ministerial notification) are not applicable, an advance evaluation conducted by the High Pressure Gas Safety Institute of Japan(KHK) is available. For more information, please contact us.
